# Who Are We

## World Renowned Manufacturer

From humble beginnings as a manufacturing testing platform to becoming the 18th largest manufacturer in the world in less than 10 years, Sailun pushes the limit of tire production research and development to ensure we stay customers centric. Our goal is always to provide customers and end users with the best value tire products and services. Therefore, we have established local distribution and sales support staff in key areas and ensured we partner with quality distributors who fall in line with the Sailun Tire vision.

## Research & Development

The roots of Sailun dig deep and have close connections with one of the premiere schools focusing on rubber and tire technology – Qingdao School of Science and Technology. The cooperation between the school and Sailun continues to this day and together we are defining what it means to be a quality tire manufacturer. Sailun stays committed to this level of development by consistently investing 30% of our total revenue into our R&D programs.

## Our Passion

Our passion is our customers - we push our own capabilities every day to ensure you receive the best quality products and services to boost your business.

## Our Vision

We look to create a product for end-users worldwide that provide comparable quality and safety, but at a value price.

# History

## 2009

April - Sailun is awarded the honor of being named the as the tire technology research demonstration base of China.

## 2002

November - Qingdao Sailun Tire Co., Ltd. is established in Qingdao, China.

## 2003

April - Sailun Industrial Park is completed.

## 2004

September - Sailun obtains DOT certification from the United States Transport Authority.

## 2006

In November, the first all steel OTR tire product was successfully produced.

## 2007

July - PCR factory is officially put into use. The company is renamed "Sailun Tire Co., Ltd."

## 2008

August - With the support of the National Development and Reform Commissions of China, the company begins renovations on the tire demonstration production line.

## 2011

Sailun becomes the first private tire manufacturer to be listed on the Shanghai Stock Exchange.

## 2012

April - Sailun Vietnam factory begins construction.

June - opening of the new R&D center in Qingdao. Sailun obtains majority stake in Shenyang Peace Dove Tire Co., Ltd.

## 2013

June - Sailun Vietnam factory officially opens. New OTR 40.00R57 product size is approved for production.

## 2014

January - Sailun acquires 100% stake in KRT Group.

April - Sailun acquires 52% stake in Goma Group.

## 2015

July - Sailun Group and Zhengzhou Nissan enter their first off-road rally together at the Taklimakan International Rally

## 2016

August - Sailun successfully manufactures the world's largest OTR tire size, 63 inches.

## 2017

June - Sailun Group Named "China Top 500 Brand".

August - Sailun Vietnam's first specialty tire is completed.

## 2018

November - Sailun Motorsport crowned China D1GP Singles and Drift-Chase Champions.

December - Sailun and Cooper announce Vietnam Plant Cooperation.

## 2019

June - Sailun group brand value reaches 50 billion RMB, ranked 157th among Chinese brands.

July - Sailun becomes Valencia CF Global Tire Partner.

August - Sailun named as a top 3 Chinese Tire Company.

November - Sailun and Cooper ACTR Vietnam Factory open. Sailun Motorsport places in Top 8 of the FIA IDC in Tsukuba, Japan.

# Sailun Tire Reaches the Top 8 of FIA Intercontinental Drifting Cup

On Nov. 30th and Dec. 1st, the world's highest level of drifting competition, the 2019 FIA Intercontinental Drifting Cup (IDC), officially started in Tsukuba Circuit, Ibaraki, Japan. 25 top drivers from 16 countries including China, Japan, England, Thailand, Malaysia, Italy, New Zealand and more served up a visual feast to racing enthusiasts. In the end, 3 drivers from Sailun Tire Drift Team reached the top 8 showcasing the strength of Sailun Tire products and the skill of the drivers.

In order to enter the FIA IDC, all participants are required to have obtained at least one national championship title to qualify. As their first entry on the global competition stage, Sailun Tire Drift Team were equipped with brand new racing cars and selected outstanding drivers with the likes of Tengku Djan Ley, Chen Wengqian, Feng Renzhi, and Xia Changhao for this world-class competition. In the face intense competition and an unfamiliar track, the team delivered their best performance to-date. 3 drivers except Xia Changhao reached into the last 16 during the singles qualifying rounds and the drift chase finals. In the final, Feng Renzhi was pitted against the winner of 2017 FIA IDC, Masato Kawabata, while Tengku Djan Ley had to take on Mad Mike, whose car has the most powerful engine, and Chen Wengqian against the champion of 2018 FIA IDC, Georgy Chivchyan. The had to take on the world's top racing drivers in their debut on the world stage. In the end, Feng Renzhi and Tengku Djan Ley reached the top eight showing their extraordinary strength and immeasurable potential.

Sailun Group partners from Central Asia and Southeast Asia were there help cheer the team on in their first foray and experience the excellent product performance of Sailun Tire products.

The future of Sailun Tire Drift Team is bright and worth following up on. Not only do the team drivers have great potential, but the product strength of the Sailun drift products will only continue to improve. It is well known that tires are a racing car's biggest performance variable during competition. Great tires will naturally promote better results. It cannot be overlooked that tires designed for the track conditions and the capabilities of the driver will greatly increase a drivers' confidence. Due to the continued win streaks and after continuous racing tire tests, technology accumulation, and the use of cutting-edge technology, Sailun Tire officially established the SAILUN MOTORSPORT department in the beginning of October 2019.

The department specializes in racing tire R&D, slick and semi-slick tire testing, provides on-site technical support to the drifting team, and are in charge of the global sales of the newest category of Sailun tire products. "GENE R", the professional sports tires produced by SAILUN MOTORSPORT, are divided into two series: GENE R Podium, which are racing specific, and GENE R Pole which are meant for amateur and street purposes. Both product series are planned for launch in early 2020 for global consumers. Consumers will soon be able to experience the driving experience of top-notch tires in their daily lives. In the future, Sailun Tire will continue to launch new tire products for racing, rally, formula, and more to increase the product types, develop top of the line tire technology, and to export china-developed tire products to world-class events.

During this foray onto the international scene, Sailun Tire Drift Team displayed the true strength of Chinese drivers and Chinese tire brands to the world. In the future, Sailun Tire will continue to improve their capabilities and achieve better results in this, and more, world-class events.

## SAILUN-PTPA FOUNDATION

The screenshot shows the homepage of the Parent Tested Parent Approved (PTPA) website. It features a banner for the 2019 Product Safety Year Booklet, a search bar, and a large image of a Sailun Atrezzo all-season tire. The page includes navigation links like 'Winning Products', 'Test Products', and 'Parties & Giveaways'.

# Sailun Tire Teams up with Valencia CF

Exciting Partnership Delivers Thrilling Best-in-Class Performance Together

VALENCIA CF GLOBAL TIRE PARTNER

Sailun Tire is proud to announce its first major global sports partnership with prestigious Valencia CF, one of the most well-recognized football clubs in La Liga with strong supporters and fans all over the world. This exciting announcement marks the very first time a Chinese brand like Sailun has ever been present in La Liga, as well as the first time appearing on an official jersey of a top European league team.

"Our incredible partnership is based on the reflected values shared between both organizations: embodying quality (football), commitment to our partners (fans), pursuing excellence (on the field), plus incredible levels of teamwork and collaboration. We are extremely excited to work with the wonderful players, staff, and fans of Valencia CF," said Chen Huang, Managing Director of Sailun Tire Europe.

Similarly to the innovative tire brand, Valencia CF is also known for delivering thrilling performance and having an equally relentless commitment to winning, with six La Liga titles, eight Copa del Rey titles, one Supercopa de España and one Copa Eva Duarte to their credit. Known throughout Europe as home to one of the best youth academy programs, Valencia CF is equally as focused on investing in the future, just like the talented team at Sailun Tire.

Through this major sports partnership, Valencia CF offers a strong global platform for Sailun Tire to create direct engagement with customers and consumers – letting sports fans and everyday drivers out there discover the true product value Sailun has to offer as the smarter alternative to competitors. Valencia CF not only reflects the core company values of Sailun, but also boasts a passionate fan base and a fantastic platform to help communicate and amplify the Sailun brand message on a global scale.

"We ourselves in the past two years have decided to have greater ambitions as a team to what we can do in the world of football. One of our greatest ambitions is to build the Valencia CF academy to develop great players not only for Valencia but other clubs also; we are heading in this direction quite successfully. We are excited to have Sailun along for this journey and demonstrate them that they have made the right choice to partner with our club," said Mr. Anil Murthy, President of the Board of Valencia CF.

About Sailun – Our Future  
The overall goal of Sailun Tire is to become a top 10 tire manufacturer by the year 2025, and Sailun is prepared to employ all of its assets to do so. This includes the use of modern, smart tire manufacturing bases in China and Vietnam, plus local R&D bases in Canada, Germany, China, and Vietnam to help support its global operations at a localized level.

About Valencia CF  
Valencia CF, one of the most decorated Spanish football clubs both nationally and internationally, was founded March 18, 1919 by Octavio Augusto Milego and Gonzalo Medina. The club's centenary year was marked by an exceptional season in which it brought home the Spanish Copa del Rey, the eighth in its collection, on top of classifying to compete in the UEFA Champions League for the second consecutive season.

# Why Choose Sailun?

Are you a distributor looking to add greater value to your line-up? Look no further than the quality engineered Sailun products to help benefit your brand line-up.

Because 

## Category Leader

Sailun is the  
**18th**  
largest tire manufacturer in the world.

## Full Product Line

It is Sailun's main focus to develop products that are customer-led and market oriented, which ensures they meet customer requirements. Through this process we have developed a full line of quality PLT, TBR, and OTR tire products that have been proven to perform in any conditions.

## Quality Manufacturing

Quality Assurance and Quality Control are required when developing a product built to keep people safe. That is why Sailun only uses equipment from industry leading suppliers and a self-developed manufacturing process control system to ensure product quality.

## Great Brand Value

Value doesn't stop at the quality of our products, it is also ingrained throughout the tire life cycle. Our mission is to generate the greatest value possible to all stakeholders at every stage of the process, and this ethos is incorporated into R&D, production, logistics, sales, and marketing.

## Research & Development

This is where Sailun products are born. Our 30% annual investment of revenue is geared towards improving our testing capabilities, equipment, and empowering our engineering teams in Europe, North America, and Vietnam.

## Excellence in Channel Support

"Think Global, Act Local": Sailun maintains dedicated support centers around the world staffed with tire industry professionals to help service customers locally.

HIGH PERFORMANCE TIRE

# ATREZZO ECO

## PERFORMANCE RATINGS:

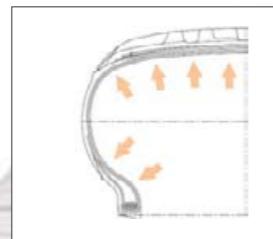

Three wide main grooves and small lateral grooves that run through the sidewall effectively enhance wet grip and improve hydroplaning resistance.

Added a lightning pattern in the tread for greater aesthetics.

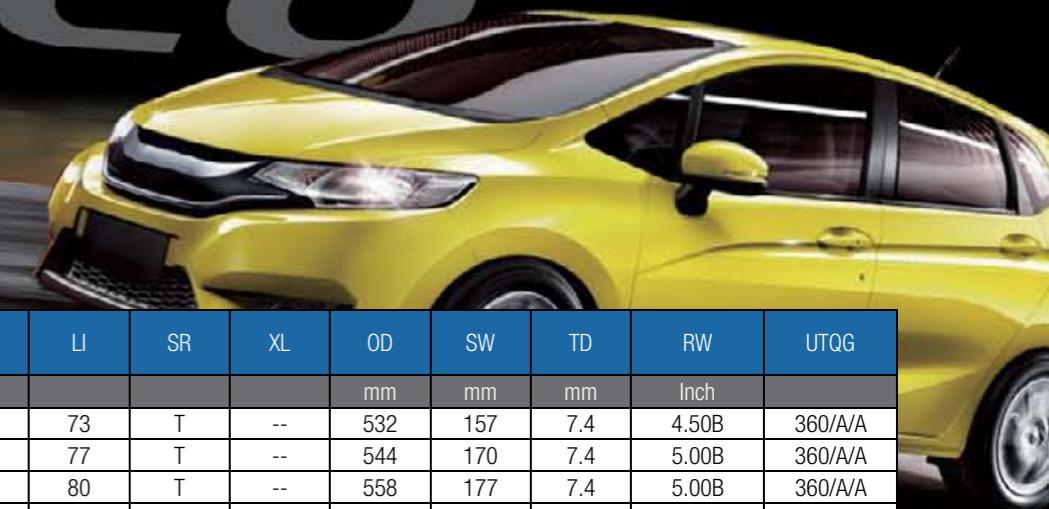

Two center ribs and reinforced grooves help improve tire rigidity for excellent handling. Effectively reduces rolling resistance and improves fuel economy.

Solid large block shoulder design provides exceptional grip to ensure vehicle stability.

► Adjusted the internal structure of the tire to optimize the distribution of contact stress which improves comfort and lowers rolling resistance.

HIGH PERFORMANCE TIRE

## ATREZZO ELITE

### PERFORMANCE RATINGS:

Wet Performance:	9
Dry Performance:	9
Ride Comfort:	8
Quietness:	8
Tread Life:	8

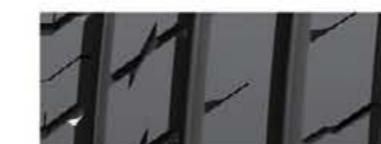

Four wide main grooves and tread sipe design effectively drain water to improve wet grip.

Asymmetric tread design whose inner tread elements help provide efficient drainage, and the outer tread elements offer exceptional handling to obtain optimal driving performance.

A strip within the outer groove not only makes the outer block more robust, but also improves the handling performance. The design adds a special and attractive look to the tire.

Simple staggered layer groove design makes the pattern more dynamic.

ALL-SEASON PERFORMANCE TIRE

# ATREZZO 4 SEASONS

**PERFORMANCE RATINGS:**

Wet Performance:		8
Dry Performance:		8
Ride Comfort:		8
Quietness:		7
Tread Life:		8
Snow Performance:		8
Ice Performance:		7

The unique 4 season asymmetric pattern is designed for use all year round.

Zigzagged sipe and block design maximize grip in water and snow. The three main grooves quickly and effectively drain water and snow for a safer drive.

1

2 Newly introduced 3-Dimensional grooves and sipes ensure optimal performance for the entire life of the tire.

ALL-SEASON PERFORMANCE TIRE

# INSPIRE

## PERFORMANCE RATINGS:

## Focus on Mileage

1. The tire tread employs a specialized SBR formula and high wear-resistance carbon black which focuses on providing exceptional cut and wear resistance to improve tire mileage.
2. Through finite element simulations, Inspire is designed with an optimized contour design which evenly distributes grip pressure to improve even wear.

## Driving Comfort

- Five varying pitch designs created using SJPPS noise simulation effectively reduce noise emissions.
- Application of a frequency distortion while improving driving stability
- Sipe design and stable pattern rigidity improve balance for a more comfortable driving experience

## Safety

- The strengthened carcass and the even contact pressure distribution improve safety while also offering greater handling and stability.
- Jagged sipe designs increase stability, reduce block deformation, and improve driving stability.

## All-Around Product

- Tread formula design provides excellent wear and cut resistance suitable for multiple driving applications.
- Specialized rubber materials allow the tire to perform exceptionally in both cold and warm weather.
- Varied jagged sipe designs break through water film and improve tread block rigidity for greater traction on both dry and wet road surfaces.

ALL-SEASON PERFORMANCE TIRE

# ATREZZO SH406

## PERFORMANCE RATINGS:

### Groove Design:

Efficient water drainage and superior high speed stability.

### Sipe Design:

Improve heat dispersion. Reduced noise emissions.

### Reinforced Shoulder:

Greater driving stability.  
Improved durability for a longer tread life.

ALL-SEASON PERFORMANCE TIRE

# ATREZZO TOURING LS

**PERFORMANCE RATINGS:**

The **TOURING LS** is designed with comfort in mind, and engineered to go the distance. The Touring LS provides exceptional handling in both dry and wet weather conditions, while delivering all-season performance and value.

- All-season compound designed for optimal comfort and grip.
- Special compound formulation for enhanced durability and maximum tread life.

**1 Siping Angles:**

Reduces noise generated when traveling at high speeds and enhances driving stability.

**2 Variable Pitch Design:**

Optimized to ensure a quiet and smooth ride.

**3 Large Contact Area:**

Wide, solid footprint for exceptional handling and driver control.

ULTRA HIGH PERFORMANCE TIRE

# ATREZZO IR R01 SPORT

## PERFORMANCE RATINGS:

## ATREZZO R01 SPORT

- The normal operating state of the tire has good dry and wet performance to meet normal usage needs. Reaching other higher operating temperatures, the softened tread becomes highly viscous, in turn improving grip performance to meet competition requirements.
- Specialized tread compounds which are designed to work best in racing conditions.

**1** Widened tread and wave-like central rib design ensure greater high speed stability.

**2** Sleek and wide shoulder grooves effectively drain water.

**3** Big shoulder blocks improve stability and handling to meet performance needs.

High-end product with unique sidewall design; employs curved incisions which fully reflects its sporty and urban look.

Curved grooves improve abrasion resistance and the rounded corners on the tread block edges protects the tire from damage.

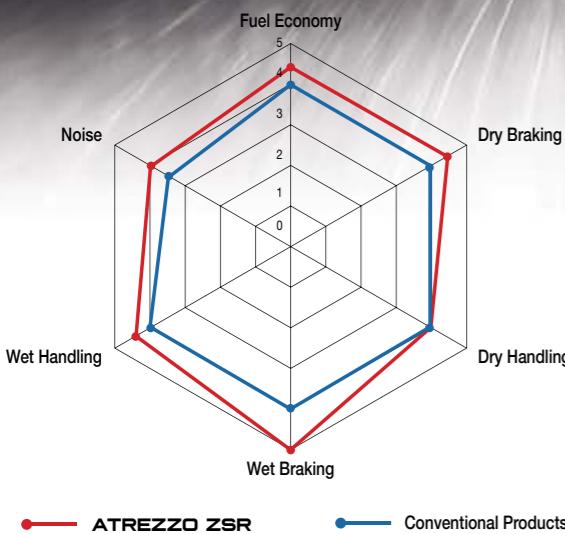

Special rubber formulation improves tire strength and grip.

ULTRA HIGH PERFORMANCE TIRE

# ATREZZO ZSR

## PERFORMANCE RATINGS:

The new generation **ATREZZO ZSR** is engineered to deliver precise wet and dry handling performance. With an asymmetrical tread design and enhanced tread rubber formula, Atrezzo ZSR rises to the challenge and provides exceptional performance on the street and on the highway.

- Asymmetrical tread design for uncompromising performance.
- Wide shoulder blocks and high angle sipes improve high speed performance.
- Variable pitch tread design provides a smooth, quiet ride.
- Advanced tread compound delivers superior cornering and exceptional handling.
- Deep, circumferential grooves and hundreds of biting edges deliver excellent wet and dry traction.

## High Speed Stability

The central rib pattern improves high speed stability to improve driving comfort.

## Cornering

The reinforced shoulder design improves grip for effective corner capabilities.

- 1** Special tread compound formula reduces rolling resistance and improves skid resistance.

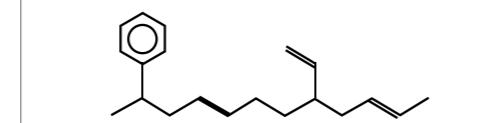

White Carbon Black Filler

White carbon black sticks better to the body of the tire which creates less friction. This greatly reduces the tire's rolling resistance. White carbon black is more flexible making it better at absorbing shocks from road deformations and improves grip.

- 2** Main tread rubber material greatly improves hydroplaning resistance to provide you with a safer ride.

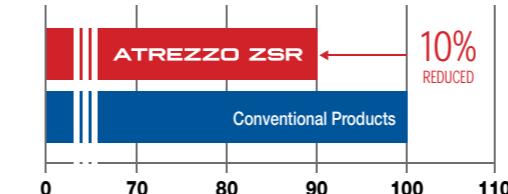

Carbon Black Filler

High content of Styrene Vinyl which provides great hydroplaning resistance.

ULTRA HIGH PERFORMANCE SUV TIRE

# ATREZZO ZSR SUV

## PERFORMANCE RATINGS:

**ATREZZO ZSR SUV****Special Tread Compound**

The tread formula effectively improves wet driving capabilities and improve rolling resistance for improved fuel efficiency.

**Comfortable Ride**

Groove pattern improves driving stability and works with the optimized variable pitch arrangement to reduce noise emissions.

**Asymmetric Pattern for Balanced Performance**

The asymmetric pattern design boasts two strengths; the inner sidewall is adept at draining water to increase wet performance, and outside sidewall with its large tread blocks improves grip while cornering.

**High Speed Performance**

Widened tread surface design; when in contact with the ground the specially structured crown evenly distributes force to achieve precise control at high speeds.

ULTRA HIGH PERFORMANCE SUV TIRE

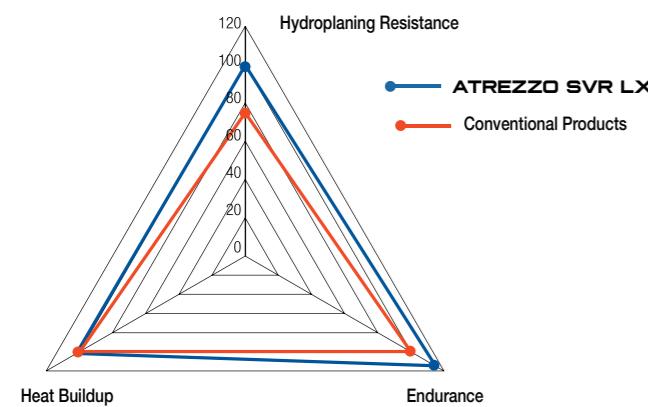

# ATREZZO SVR LX

## PERFORMANCE RATINGS:

Wet Performance:	
Dry Performance:	
Ride Comfort:	
Quietness:	
Tread Life:	

The **ATREZZO SVR LX** is a premium high-performance tire designed for SUV and crossover vehicles. An advanced tread design with a sporty look, the SVR LX accentuates the appearance of your ride, while providing exceptional all-season performance, comfort, and tread life.

- Perfect balance of style, luxury, and all-season performance.
- Available in stylish 20"-24" sizes with M+S ratings for a wide range of OE and plus-size fitments.

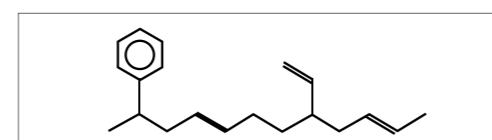

## Groove Design

All grooves are slightly inclined to effectively funnel water out of the tire for improved hydroplaning resistance.

## Shoulder Grooves

The variable pitch design on the shoulder grooves and the sipes improve grip and handling for all seasons. They also effectively reduce noise emissions for improved driving comfort.

1 The tread formula compounds ensure excellent wear resistance for greater fuel economy.

2 The specialized formula also substantially increases wet grip.

**SVR**

## Directional Tread Pattern

The uniform V-shaped tread pattern design provides excellent grip, handling, and high speed performance in both dry and wet conditions. Efficiently drains water for a safer driving experience.

## Sipe Design

The unique sipe design on the shoulder provides better stability on dry and wet roads as well as effectively reduces noise emissions.

ULTRA HIGH PERFORMANCE SUV TIRE

# ATREZZO SVR LX+

## PERFORMANCE RATINGS:

### Excellent High Speed Performance

Symmetric tread pattern design improves high-speed acceleration.

Central rib pattern improves upon high-speed stability for a more comfortable drive.

### Wet Application Pattern Design

Four main grooves are designed to effectively drain water.

The groove and sipe designs running from the shoulder to the center of the tread effectively break through water film making it perfect for wet road conditions.

### Improved Stability

The three-dimensional groove design located on the tread block edges improve tread block rigidity and driving stability.

### Extended Service Life

The ground contact force on the tire has been designed to distribute more evenly ensuring greater driving stability and promoting even wear.

### Reduced Noise Emissions

An optimized tread pitch arrangement significantly reduces noise emissions.

The widening groove design extending from the center to the shoulder effectively disrupts noise frequencies to reduce noise emissions.

MUD-TERRAIN LIGHT TRUCK &amp; SUV TIRE

# TERRAMAX

## M/T

## PERFORMANCE RATINGS:

**Strong Carcass**

The three layer carcass design significantly improves tire strength for better resistance to impacts.

■ Staggered shoulder blocks improve traction and climbing capability.

**Z-Shaped Grooves**

The z-shaped grooves between blocks is designed specifically to enhance off-road driving capabilities by improving grip and climbing ability.

**Grooves**

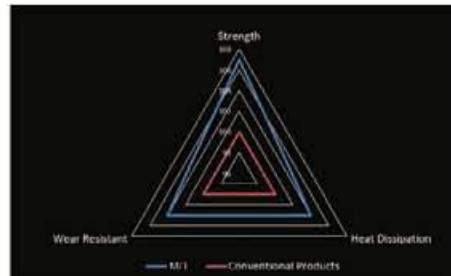

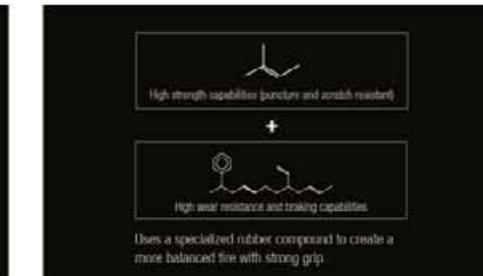

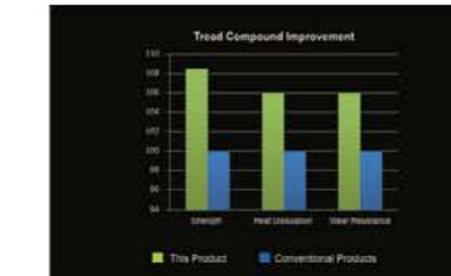

Deepened grooves allows mud to easily be discharged from the tread at both high and low speeds. The design also offers better grip when traveling on rocky or rugged roads.

**Shoulder Design**

Large blocks on the shoulder vastly enhance handling on muddy and rock roads.

**Safety**

The shield pattern which extends from the sidewall protects the sidewall from abrasions and increase traction on mud roads. The carcass is designed with three layers of polyester fabric to make it rugged and resistant to strong impacts.

HIGHWAY-TERRAIN LIGHT TRUCK &amp; SUV TIRE

# TERRAMAX

## HLT

**PERFORMANCE RATINGS:**

Wet Performance:	<span style="color: red;">8</span>
Dry Performance:	<span style="color: red;">9</span>
Ride Comfort:	<span style="color: red;">9</span>
Quietness:	<span style="color: red;">8</span>
Tread Life:	<span style="color: red;">10</span>

**Large Block Face**

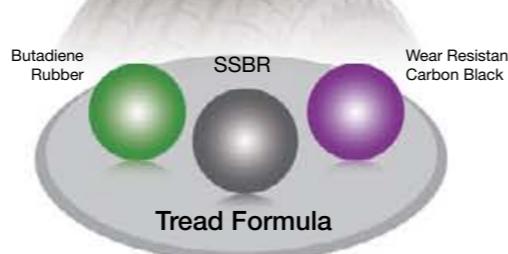

The large block face design effectively increases the ground contact area of the tire to improve overall handling, wear and grip performance.

**Four Extra Wide Main Grooves**

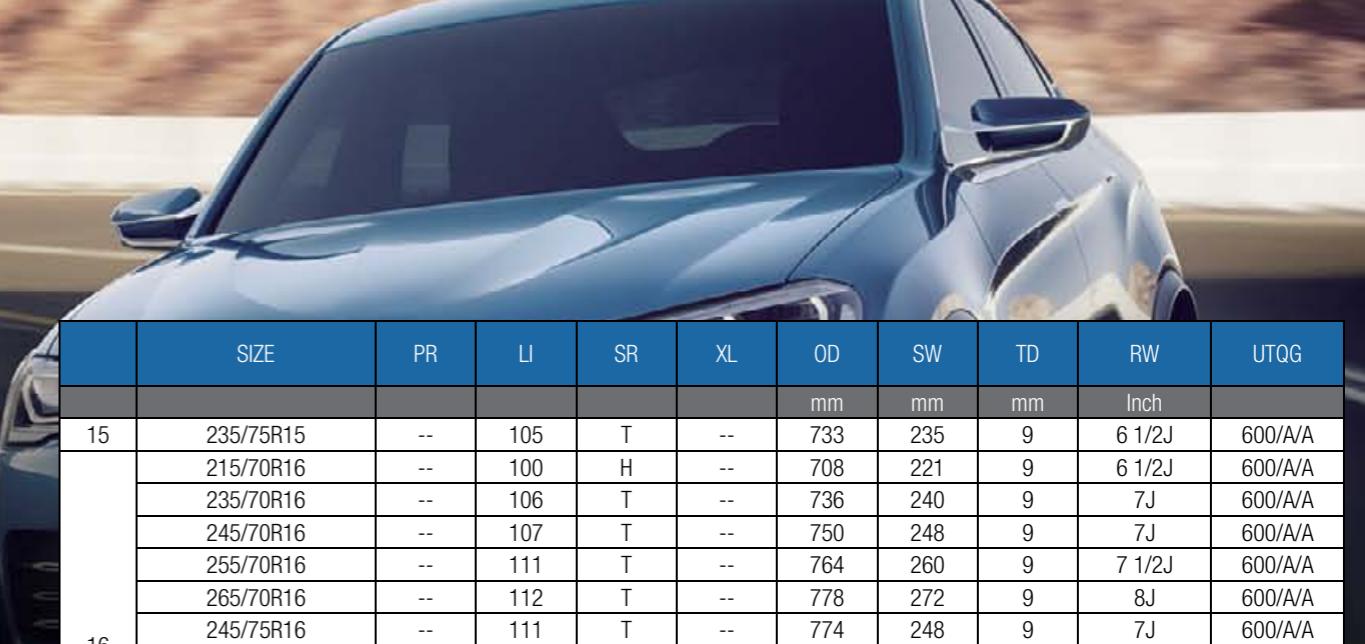

Four widened main grooves enhance directional stability and water drainage to allow for excellent handling and traction on wet and dry roads.

**Pattern Pitch Optimization**

The pattern pitch arrangement effectively reduces noise to create a quieter driving experience.

**High-Performance Tread Compound**

A specialized mixture of SBR solution and ultra-wearable carbon black particles allows this tire to boast a longer life while also providing improved wet skid resistance and wear resistance.

ALL-TERRAIN LIGHT TRUCK & SUV TIRE

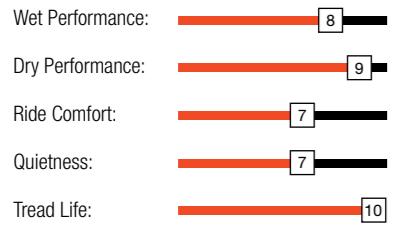

# TERRAMAX

## A/T

The NEW Terramax A/T 3PMS is designed to deliver superior traction for SUVs, pickups and vans both off and on the road. The NEW Terramax A/T 3PMS provides the same exceptional handling, on-and-off-road stability and quiet, comfortable ride as the original Terramax A/T with the added bonus that it is winter tire tested and approved!

### PERFORMANCE RATINGS:

The **TERRAMAX A/T** is designed to deliver superior traction for SUVs, pickups and vans both off and on road. The A/T provides exceptional handling and on-and-off-road stability while maintaining a comfortable ride.

- Aggressive open shoulder tread design expels water, snow, slush and mud for optimum traction in all terrain conditions.
- Solid center rib provides superior comfort comfort and control.
- Extra deep tread sipes at varying angles improves comfort without sacrificing traction.

#### Large Serrated Block Design

The serrated block design provides excellent grip and traction performance.

#### Open Shoulder Design

Improved high speed stability and traction on dry and wet roads.

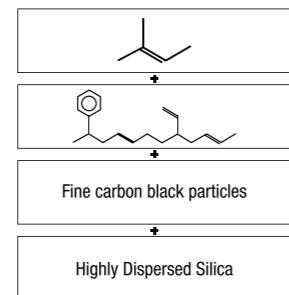

#### Tread Pattern:

Effectively removes gravel and is capable of withstanding punctures from harsh pavements. Protects the tread from damage.

#### Staggered Tread Blocks

Can effectively prevent uneven wear to improve off-road performance.

#### -High Strength

- Cut and Puncture Resistant
- High Wear Resistance
- Strong grip
- Great Hydroplaning Resistance
- Low Rolling Resistance
- Highly Elastic at Low Temperatures
- Excellent Winter Performance
- Exceptional Driving Safety
- Low Heat Buildup
- Long Tread Life

#### Fine carbon black particles

#### Highly Dispersed Silica

## TERRAMAX A/T

### Downward Claw-like Shoulder Design

Domineering style that effectively dissipates heat when driving long distances and at high speeds.

### Sidewall Rim Protector

A shield design protects the alloy rims from collisions, impacts, and supports the sidewall.

### Three-dimensional Peak Sidewall Design

Strengthens the sidewall to improve abrasion resistance.

**Aggressive Open Shoulder Tread design:** efficiently expels snow, water, slush, and mud for optimum traction in all-terrain conditions.

**Multi-directional Sipe System:** Extra deep tread sipes at varying angles improve comfort without sacrificing traction.

### Solid Center Rib:

Provides superior comfort and handling.

MUD-TERRAIN LIGHT TRUCK & SUV TIRE

## TERRAMAX AT-M

### PERFORMANCE RATINGS:

### Traction Performance

Widened running surface ensures superior traction performance in all types of road surfaces.

### Climbing Performance

Tread blocks maintain a staggered bite to improve traction and climbing ability.

### Efficient Self-Cleaning Performance

Widened shoulder grooves and nodules within the tread grooves effectively eject mud, sand, gravel, and other debris to improve grip.

### Strong Sidewall

Lengthened tread shoulder employs a multi-layered protruding design that improves strength and prevents damage to the carcass, allowing for a safe off-roading experience.

## PERFORMANCE RATINGS:

Wet Performance:	<span style="width: 80%;">8</span>
Dry Performance:	<span style="width: 90%;">9</span>
Ride Comfort:	<span style="width: 70%;">7</span>
Quietness:	<span style="width: 70%;">7</span>
Tread Life:	<span style="width: 100%;">10</span>

### Shoulder Edge Design

The trapezoidal claw design improves traction in snow and mud, enhances shoulder heat dissipation, and strengthens overall tire durability.

### Jagged Edge Tread Block

The trapezoidal claw design improves traction in snow and mud, enhances shoulder heat dissipation, and strengthens overall tire durability.

### Zigzag Groove Pattern

The central zigzag tread block provides outstanding grip and traction performance.

### Open Shoulder and Anti-Stone Lodging Design

The open shoulder design increases stability and traction when turning at high speeds in both dry and wet weather. The anti-stone lodging design effectively discharges stones, withstands harsh road conditions, and protects the tread from damage.

ALL-SEASON LUXURY CROSSOVER & SUV TIRE

# TERRAMAX CVR

## PERFORMANCE RATINGS:

Wet Performance:	<div style="width: 80%;">8</div>
Dry Performance:	<div style="width: 90%;">9</div>
Ride Comfort:	<div style="width: 90%;">9</div>
Quietness:	<div style="width: 80%;">8</div>
Tread Life:	<div style="width: 100%;">10</div>

The **TERRAMAX CVR** is an all-season tire specifically engineered for SUV and crossovers. The CVR delivers exceptional handling and stability for today's crossover vehicles without compromising ride comfort.

- Smooth and quiet ride for a more comfortable driving experience.
- Top all-around performance on wet and dry roads.
- Excellent handling and a stable ride, especially at high speeds.
- Durable and long lasting design.
- Suitable for off-road usage.
- H, V, W rated construction.

Large shoulder blocks and center ribs provide responsiveness and high speed stability.

Widened tread design offers a larger ground contact area which effectively improves grip performance.

Tread design offers greater driving comfort and reduces noise emissions.

Four main grooves and small gradually winding lateral grooves reduce rolling resistance and effectively drain water for improved hydroplaning resistance.

The strong casing and special tread compound increases service life, driving comfort and excellent overall driving performance.

ALL-SEASON LUXURY CROSSOVER & SUV TIRE

# TURISMO SV57

## PERFORMANCE RATINGS:

Wet Performance:	
Dry Performance:	
Ride Comfort:	
Quietness:	
Tread Life:	

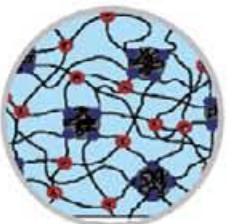

The overall stiffness of both the tread and sidewall ensures stable steering performance.

### Designed for Handling Performance

Tread grip and handling sensitivity is improved through the widening of the tread grooves and narrow sipes. The main groove design is effective at quickly expelling water while the lateral grooves break through water film to prevent hydroplaning.

### Mileage Focused

The special rubber compounding binds the compounds together more effectively to improve wear resistance. The symmetric tread pattern design with improved stiffness promotes even wear and reduces instances of chunking while driving at high speeds.

### Noise Cancellation

Tire noise is effectively reduced through an optimized block distribution and carcass design. The groove wall design improves air flow through the tread to reduce noise emissions while driving. The stiffness of the tread allows for air to easily be pushed through to the shoulder and outside the tire.

### On-Road Comfort

1. The FEM designed tread profile has been optimized to transition force more effectively throughout the tire.
2. The widened central and shoulder grooves, and small sipe design work together with the tire's overall tread stiffness to improve driving performance.
3. The brand new tread compounding helps deliver a more comfortable driving experience.
4. This tire category has a high aspect ratio with high stiffness improves sound dampening.

ULTRA HIGH PERFORMANCE TIRE

# TURISMO SU58

**PERFORMANCE RATINGS:**

Wet Performance:	9
Dry Performance:	9
Ride Comfort:	9
Quietness:	9
Tread Life:	8

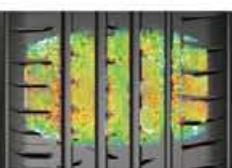

**Wet Performance**

The inside multi-groove design enlarges the road contact area by efficiently evacuating large quantity of water. The inside block's long sipe design combined with the lateral groove easily break through water film for improved safety in wet road.

The updated tread compounding drastically improves wet grip.

**Dry Performance**

The special tread compound further increases the bite capability of the tire for improved grip on dry roads.

**Low Noise Emissions**

Through simulation testing, the five pitch tread design was optimized and applied to effectively reduce noise while driving.

The pattern is designed utilizing the most advanced staggered frequency technology which efficiently reduces noise emissions while driving.

**Handling Performance**

Handling stability is improved due to the optimization of the tread footprint and pressure distribution created through digital testing systems.

An asymmetric pattern designed with larger outside pattern blocks improves lateral grip for a smoother ride at high speeds.

The integrated pattern design ensures high speed driving stability.

ULTRA HIGH PERFORMANCE TIRE

# TURISMO SU59

**PERFORMANCE RATINGS:**

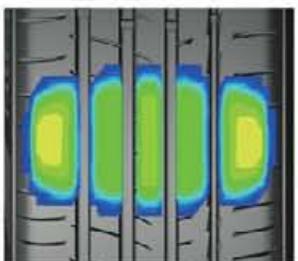

Wet Performance:	9
Dry Performance:	9
Ride Comfort:	9
Quietness:	9
Tread Life:	9

**Reduced Noise Emissions**

The multi-angle asymmetric pattern design off-sets tire vibration to reduce noise emissions. The tread's five pitch design has been tested to efficiently reduce noise while driving.

**Handling Performance**

This asymmetric pattern design has an 8% additional surface contact area and a widened outside shoulder block for greater tire stability, allowing for a smoother ride when driving at high speeds. The integrated central block design improves stability when driving at high speeds.

**Longer Service Life**

The tread profile design optimizes surface contact area and pressure distribution uniformity. This helps to promote even tread wear and driving stability. The high wear-resistance tread compound improves tire life.

COMMERCIAL LIGHT TRUCK TIRE

# COMMERCIO

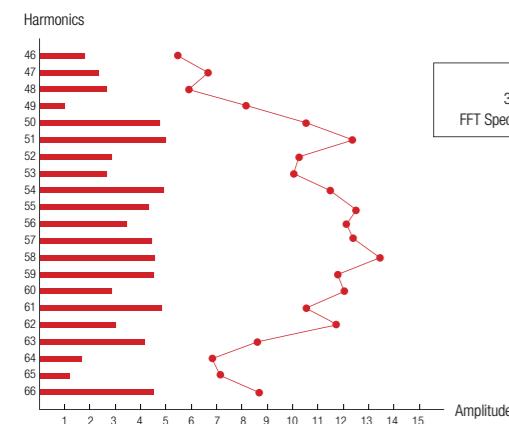

## VX1

## PERFORMANCE RATINGS:

Wet Performance:	
Dry Performance:	
Ride Comfort:	
Quietness:	
Tread Life:	

The COMMERCIO VX1 is a light truck tire engineered for commercial delivery and demanding regional applications. Featuring an enhanced compound to resist tire damage, as well as a reinforced casing to improve load capacity. The COMMERCIO VX1 delivers exceptional mileage and tread life.

New profile design with a significantly improved carrying capacity. Strengthened tread construction, abrasion resistance and puncture resistance. Special tread formula enhances traction and improves skid resistance.

**Variable Pitch Design**  
The tread is constructed with a variable pitch design which significantly reduces noise emissions for a more comfortable driving experience.

COMMERCIAL LIGHT TRUCK TIRE

# COMMERCIO VX2

## PERFORMANCE RATINGS:

**1 Groove Design**

The three main grooves and their serrated design ensure excellent water drainage while also improving upon wet grip and impact resistance.

**2 Tread Siping**

Ladder-like grooves located at the block joints effectively increase tire rigidity for greater handling performance and wear resistance.

**Side Shoulder Design**

Stylish design that adds a dynamic element for a greater visual effect.

COMMERCIAL LIGHT TRUCK TIRE

# SL12

The **SL12** is an all-season light truck tire designed for delivery and demanding regional applications. Featuring a symmetrical pattern with extra wide grooves, the SL12 delivers excellent wet traction, and a quiet-comfortable ride, while the enhanced compound is engineered to deliver exceptional mileage.

#### PERFORMANCE RATINGS:

Full-depth microsipes  
Improve heat dissipation  
and traction.

Extra-wide zigzag grooves  
deliver enhanced wet traction  
and exceptional low speed  
traction.

Wide shoulder reduces noise  
emissions and improves stability.

Black Sidewall

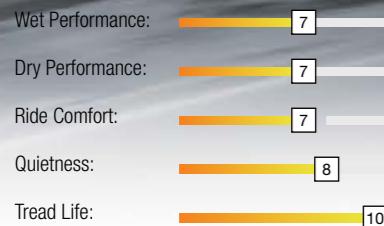

\*Both Black Sidewall & White Ring are Available

LIGHT TRUCK TIRE

# EXTMILE SL15

## PERFORMANCE RATINGS:

1. Shoulder groove design reduces heat buildup which improves durability.
2. Strengthened carcass ensures overall tire strength to ensure greater load capacity.
3. Specialized tread formula greatly improves scrub and tear resistance.

**Shoulder Groove Design**  
Reduces heat buildup which improves durability.

**Close Shoulder Design**  
Ensures greater scrub and tear resistance.

**Pipe-like Grooves**  
Optimizes ground pressure distribution for enhanced grip capabilities.

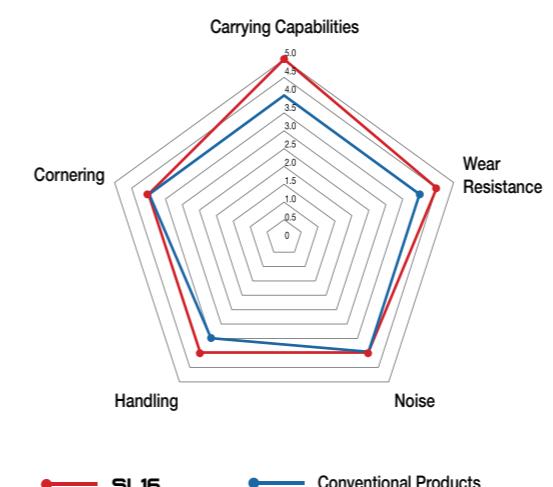

LIGHT TRUCK TIRE

# EXTMILE SL16

## PERFORMANCE RATINGS:

**SAILUN EXTMILE SERIES**

New casing design improves tire strength to ensure greater load bearing capabilities. The new tread pattern design applies a more even grip for improved wear resistance and to promote even tread wear. Widened s-shaped grooves effectively drain water and reduce stone retention. New sidewall aesthetics added.

**SL16**  
has noticeable improvements in wear resistance, load carrying capacity, and handling.

**Strengthened Casing**  
New casing design improves strength for greater load bearing capabilities.

**Optimized Tread Pattern Design**  
Even grip effectively improves wear resistance.

**S-shaped Widened Grooves**  
Widened S-shaped Grooves Effectively drains water and reduces stone retention.

**Sidewall Design**  
Three-dimensional design just below the shoulder improves tire aesthetics.

COMMERCIAL WINTER TIRE

# ENDURE WSL1

## PERFORMANCE RATINGS:

## ENDURE WSL1

Winter Snow Tire specifically designed for commercial light trucks. Specially designed formula used to conquer winter weather; provides optimal grip and stopping power on snow and ice.

Sidewall protection designed to resist against sidewall impacts and kerbing wear.

Main zigzag groove design and jagged shoulder grooves effectively drain water and snow for greater handling in wet and snowy weather conditions.

Staggered tread blocks improve handling safety while also providing greater traction.

Greater load bearing capability. Large block pattern improves load carrying capabilities and greater handling performance.

STUDLESS WINTER TIRE

# ICE BLAZER WSL2

## PERFORMANCE RATINGS:

Ice Performance:		8
Snow Performance:		8
Dry Performance:		7
Ride Comfort:		9
Quietness:		9

The **ICE BLAZER WSL2** is a studless winter tire, providing excellent slush, snow, and wet traction in cold climate conditions, while delivering a quiet and comfortable ride on dry roads.

- Green technology: Extensive use of environmentally friendly materials that meet European REACH requirements.
- Special tread formula compounds allows the rubber to maintain flexibility in extreme cold temperatures for maximum performance potential. This improves handling and overall safety for winter weather conditions.

**Unique Groove Design:**

The L-shaped grooves are specifically designed enhance grip on snow, slush, and water without compromising road noise.

**Outer Tread Block Design:**

Optimized to improve self-cleaning capabilities while also maximizing stability and overall grip in winter weather conditions. Minimized noise emissions.

**Multi-direction High Density Siping:**

Engineered to maximize directional grip on snow and ice while also minimizing road noise.

STUDLESS WINTER TIRE

# ICE BLAZER ALPINE+

## PERFORMANCE RATINGS:

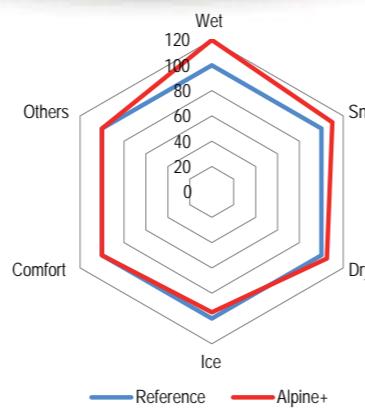

Ice Performance:		8
Snow Performance:		9
Dry Performance:		7
Ride Comfort:		9
Quietness:		9

## ICE BLAZER ALPINE+

The latest generation of HP Alpine+ winter tire for cars and family sedans massively contributes on driver's safety as it provides optimum stability and control on snow, wet and dry roads.

- Advanced technology has created a tire that provides excellent traction and braking performance on snow, wet and even dry roads.
- The spear-shape pattern disperses snow and water quickly and keeps the tire in contact with the road to function perfectly in various wintery conditions.
- The functionalized 100% silica compound not only maximizes tire grip, reduces rolling resistance and wear, but also maintains flexibility in extreme cold temperatures.

### V-shape Directional Pattern Design

V-shape pattern improves hydroplaning, wet and snow traction and braking.

### Maximized Snow Traction

A variable pitch design, and increased lateral grooves and sipes provide greater wet and snow performance.

### Optimized Pitch Sequence

Reduces generated noise and enhances anti-vibration which also promotes uniform tread wear.

### Optimized Tread Profile

Improves steering response and driving comfort.

### 100% Silica Compound Technology

Silica compound helps improve both tire grip and offer lower rolling resistance for more efficient tread wear.

### Cold Weather Compound with hardness tuned

Maintains optimum hardness and flexibility in winter weather conditions for consistent tire performance.

ULTRA HIGH PERFORMANCE WINTER TIRE

# ICE BLAZER ALPINE EVO

**PERFORMANCE RATINGS:**

Ice Performance:	<span style="width: 80px;">8</span>
Snow Performance:	<span style="width: 90px;">9</span>
Dry Performance:	<span style="width: 80px;">8</span>
Ride Comfort:	<span style="width: 90px;">9</span>
Quietness:	<span style="width: 80px;">8</span>

**ICE BLAZER ALPINE EVO**

The latest and OE(Original Equipment) style tyre designs to bring extraordinary driving experiences, and to ensure for your safety as it provides optimum stability and controllability on all wintery roads.

- Ultra High-Performance tyre exclusively developed for European cars and SUVs.
- Asymmetric pattern with balanced handling and ride comfort as a winter tyre.
- 3D sipes and the lateral grooves to significantly increase snow traction and braking characteristic.
- The functionalized 100% silica compound not only to maximize grip, low RR and wear resistance but also to maintain rubber property so consistent tyre performance in wide range of winter temperature.

Excellent traction and breaking on snow roads thanks to the traction grooves with the crossed angles.

Optimized pitch sequence to reduce tyre noise and to enhance anti-vibration and abnormal wear resistance

Big and wide pattern blocks on the outside shoulder provide better control performance on dry wintry roads.

Computer simulated Tread profile for steering/ response and ride comfort of the winter tyre.

100% Silica Compound Technology - Nano particle-like highly dispersible silica introduced not only for grip but also low rolling resistance and wear resistance.

Optimized cold resistance compound for consistent snow/wet/ice/dry handling performance in all wintery conditions.

STUDDABLE WINTER TIRE

# ICE BLAZER WST1

## PERFORMANCE RATINGS:

The **ICE BLAZER WST1** is a studdable winter tire designed for drivers that demand maximum traction in severe winter weather conditions, letting you outperform the elements to get more out of the winter season.

- Green technology: Extensive use of environmentally friendly materials that meet European REACH requirements.
- Specially formulated tread compound allows the tread rubber to maintain flexibility for exceptional performance in extreme cold temperatures. Improved safety and handling in winter weather conditions (indicated with the Severe Service Emblem).
- Specially blended tread rubber formula for excellent grip in low temperatures.

## Special Buffer Layer

Special rubber buffer layer at the bottom of the stud absorbs the impact force of snow to prevent the falling out of studs.

## ANTI-SKID PROPERTY

## Innovative Square Design

Increases the ground contact area of the tire to effectively improve grip performance and increase skid resistance.

## Cold-Resistant Tread Rubber

Tread formula compounds ensure the tire maintains elasticity and softness in extreme cold weather conditions. This improves grip on ice and snow, improves hydroplaning resistance, and lowers rolling resistance.

## V-shaped Tread Design

Improved grip on ice and snow, skid resistance, and effectively reduces noise emissions.

## Sipe Design

Optimized sipe design ensures greater grip on ice and snow.

## Improved Studded Technology

12 rows of studs are designed to maximize grip and traction performance for safer driving in winter weather.

## Sipe Design

Optimized depth and length of sipes maintain tread rigidity and greatly enhances grip and handling.

STUDDABLE WINTER TIRE

# ICE BLAZER WST2 LT

## PERFORMANCE RATINGS:

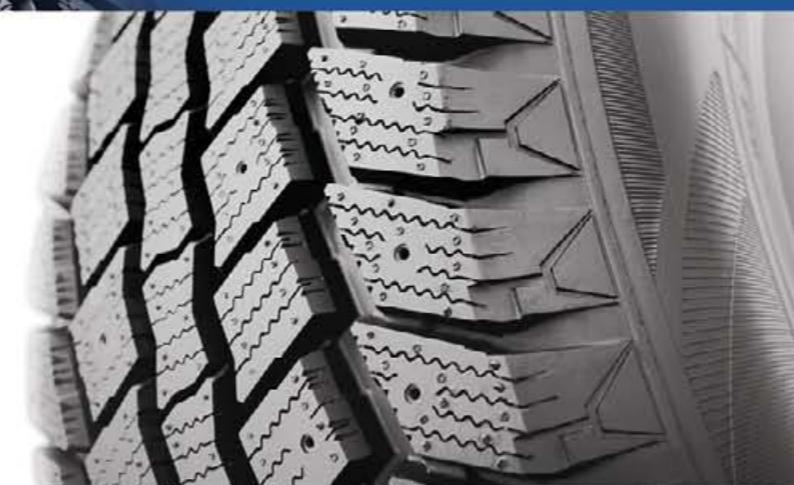

Ice Performance:		9
Snow Performance:		9
Dry Performance:		7
Ride Comfort:		7
Quietness:		7

A studdable winter tire designed for light trucks, the **WST2 LT** maintains maximum traction while tackling the toughest on-off road conditions, whether it be snow, ice, or mud.

- Green technology: Extensive use of environmentally friendly materials that meet European REACH requirements.
- Specially formulate LT tread compound allows the rubber to maintain flexibility for excellent performance in extreme temperatures. Improves safety and handling in extreme weather conditions (designated with the Severe Service Emblem).
- Specially blended silica-reinforced formula gives the tire excellent grip performance in low temperatures.

**Angled Groove Design:**  
Efficiently drains slush and water to maximize grip and handling.

## Variable Pitch Sequence:

Optimized to ensure a quiet and smooth ride.

STUDDABLE WINTER TIRE

# ICE BLAZER WST3

## PERFORMANCE RATINGS:

- A winter studded tire for cars & SUVs, the tire can also be used studies.
- The new replacement of its predecessor, Ice Blazer WST1.

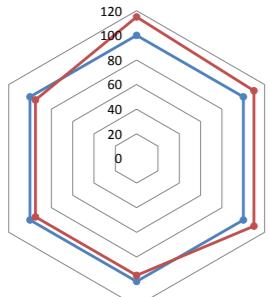

## Ice Grip

The stud pattern has been arranged in a calculated variable sequence, along with a new stud hold and pad design which helps ensure studs provide maximum grip on ice.

## Winter Traction and Braking

The unidirectional pattern with increased lateral and transverse grooves greatly improves snow, slush and even water drainage.

## WST3 Performance

## Winter Handling

Multi-layer sipes and the edged saw-tooth blocks provide better steering and stability on snow and ice.

## Winter Weather Compound

With the silica-rich tread compound, the winter tire maintains supreme grip thanks to its perfect calibration of hardness and flexibility in extremely cold weather conditions.

STUDLESS WINTER TIRE

# ICE BLAZER ARCTIC

## PERFORMANCE RATINGS:

Ice Performance:		9
Snow Performance:		9
Dry Performance:		8
Ride Comfort:		8
Quietness:		8

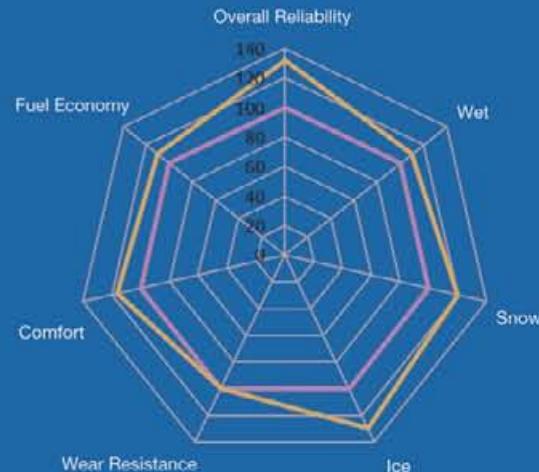

## Performance Comparison

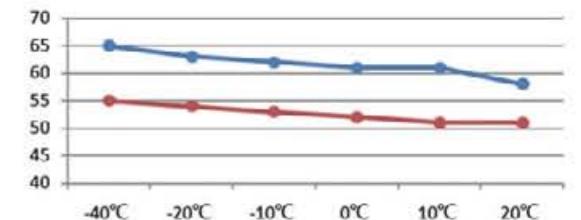

Arctic Last Generation

### Compound Stiffness

Applying a new generation tire formula has optimized the rubber property in extremely low temperatures. Compared with the previous generation, the new formula has maintained wear resistance while enhancing tire performance in winter weather.

Test Conditions	Recipe	Last Generation	ARCTIC
-40°C		65	55
-20°C		63	54
-10°C		62	53
0°C		61	52
10°C		61	51
20°C		58	51

### Asymmetric Pattern

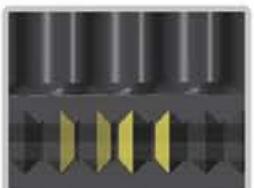

## Inside Tread:

The Z-shaped cross pattern increases the tire footprint and improves road surface adhesion. The larger number of horizontal sipes increases grip to improve braking on ice and snow.

## Outside Tread:

The increased number of crossing grooves and sipes effectively pack and discharge snow to maintain grip on snow and ice will improve braking and driving capabilities.

### 3D Interlocking Sipes

The tread blocks are separated into a dense group of fine sipes which improve tire traction on snow and ice. The base of the sipes are interlocked to enhance block stiffness which ensures greater buckling resistance and improves driving performance on wet and dry roads.

### Serratin Grooves

The micro grooves subdue sound waves which effectively reduce noise emissions. The grooves are also capable of discharging broken-up ice and snow to improve traction.

STUDLESS WINTER SUV TIRE

# ICE BLAZER ARCTIC SUV

## PERFORMANCE RATINGS:

The crisscrossing grooves designed on the tread back deliver more grip when driving in wet conditions.

The 3D shoulder design enlarges the tire contact area and enhances lateral traction

The overall design of the shoulder improves handling performance and ensures that performance doesn't degrade over the tire's lifetime.

STUDLESS WINTER SUV TIRE

# ICE BLAZER ARCTIC EVO

## PERFORMANCE RATINGS:

Ice Performance:		9
Snow Performance:		9
Dry Performance:		8
Ride Comfort:		8
Quietness:		8

**Interlocked Sipes**

The tread blocks are separated by a dense group of jagged sipes which improve tire traction. These sipes are interlocked to enhance block stiffness for greater driving performance on wet and dry conditions.

**Asymmetric Pattern**

## Outside Tread:

The wide shoulder blocks deliver more effective traction and braking performance when driving and turning on snow and ice.

## Inside Tread:

The staggered narrow grooves provide greater overall traction for safer driving on snow and ice.

**Shoulder Grooves**

The jagged shoulder grooves can grip better to snow and ice for enhanced traction.

**Outer Shoulder Design**

The special outside shoulder design improves grip in deep snow for safer driving.

ULTRA HIGH PERFORMANCE TIRE

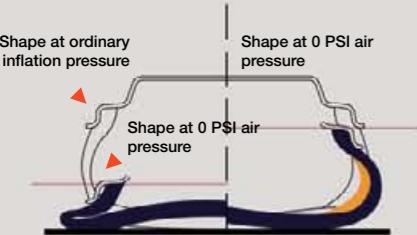

# ATREZZO RUN-FLAT

## PERFORMANCE RATINGS:

**ATREZZO RUN-FLAT**

Run-flat tires (RFT), also known as "self-supporting run-flat tires," are an important safety feature for any vehicle. A Run-flat tire is built with a thicker sidewall to help support the tire shape after losing air. This allows the tire to continue to run safely, but at a limited speed and mileage. When normal tires are punctured, they can instantly lead to a severe sidewall collapse; in the event of a collapse, the vehicle loses its only support which can cause the vehicle's center of gravity to change instantaneously. RFT helps to lessen the severity of a flat tire and allows you to get to the closest destination safely.

This is where run-flat tires come in; after the tire begins leaking air, the sidewall maintains its shape in order to continue to support the weight of the vehicle.

Standard Tire

Run-flat Tire

**RFT Product Features:**

1. Greater safety and the driver will not be delayed or stranded on remote highways because of a flat tire.
2. Avoid accidents caused by the loss of control from punctures or air leaks:  
When the tire is flat, even if all the air pressure has leaked from the tire, the vehicle will continue to drive at normal speeds without having to be replaced immediately.
3. Even when your tire begins leaking air you can drive to your local tire dealer to have it repaired. RFT technology also means there is no need to carry a spare which helps increase storage space within the vehicle.
